

Year 2 – Maths

Ever thought maths was boring! Well you should come to year 2. Our lesson this week was all about collecting data and every child had to be active. We used stop watches to time how long each activity took. Some of the activities were; how long it takes to do 10 star jumps , how quickly you could put on your PE top, how quickly you could throw a 6 on a die and how long it took to write your name five times.

We then used to data to answer some questions and discussed what influences this data.
