

Year 2 Royal Gunpowder Mills

On Thursday, year 2 visited the Royal Gunpowder Mills as part of our science and history learning. First of all we went on a 5 mile walk around the grounds looking for bugs. One of us even caught a frog! We had time to each catch a bug in groups, put them into a pot and draw them. Don't worry, we released them back into the wild after! When this activity had finished we sat and ate lunch, it was getting hotter by the minute! We then went on to make our very own rockets! This was so much fun. After we had made them, we went outside and had the opportunity to launch them! They went so high and far, it was great! On the coach back to school, everyone was a lot quieter! We all had a great day. 😊
