

Red Class have been enjoying the hot weather we have had. Sometimes it's been so hot we've preferred to stay indoors.

In maths we have been looking at organising information using tally charts and Venn diagrams. The children have enjoyed sorting foods into healthy and unhealthy and asking questions in the class to find out information. In understanding the world the children have been learning about sources of light and if they are natural or not. The children particularly enjoyed exploring torches in our black out tent. They were very excited to make an electrical circuit and see how a lightbulb turns on when connected to the battery.

Outside the children have been having so much fun. They have created their own puppet shows, mixed sand and water to build with and formed their own musical band.
