

Design & Technology

Year 1 have been learning about the Great Fire of London in History. The children learn about why the fire spread so quickly and found out that it was partly due to the way the houses were built. They made their own Tudor style house, thinking carefully about the wooden beams in the houses that were responsible for the rapid spread of the fire. 1SR lined their houses up together to show how close together they would have been in 1666, which meant that the fire would have spread from house to house very quickly, helped by the wind.
